

# BIBLICAL SUPERNATURAL HEALING

## Praying for the sick as Jesus intended

- This five-session course delves into the many aspects of praying for the sick. It examines the distinction between healing and miracles, explores why miraculous healings seem rare today, and investigates whether miracles still occur—supported by medical evidence. The author, involved in founding [globalmri.org](http://globalmri.org), has contributed to research on the validity of prayer-related healings.
- Throughout the course, we'll discuss the role of faith, safe and unsafe approaches to praying for others, practical ways to pray, and reasons why healing may not always be seen. We'll also explore whether we should pray for everyone in need, noting that the New Testament outlines six reasons why people fall ill—only one of which involves healing.

## Session 1 Why are people sick

---

- Causes of sickness
- Physical
- Emotional
- Spiritual

## Session 2

---

- Six reasons the bible teaches why people are sick
- Should I pray for everyone who is sick?
